

HARLEQUIN'S RANGE OF BALLET BARRES

Whether you choose portable free-standing or permanent wall-mounted ballet barres, you'll realise they are almost a prerequisite for the dancer. Without a comfortable and sturdy barre it is hard to do the essential warm-up and stretching exercises. Both amateurs and professionals can minimise the risk of injury by stretching properly to increase blood-flow to the muscles and improve flexibility whilst achieving an elegant stance.

Single and Double Wall-Mounted Ballet Barres

Harlequin's Wall-Mounted Barres feature various shaped mounting plates to suit the design of your studio. All have strong fixings to the wall: four fixings for the single bracket and six fixings for the double bracket. Brackets are available in various powder-coated coloured finishes.

- Brackets are supplied complete with screws and plugs and can be mounted at any height
- Barres are set at 21cm (8¹/₄") from the wall to the centre of the barre. On the double bracket the two wooden barres are spaced 20cm (8") apart
- Wooden barre is 5cm (2") in diameter and 150cm (60") long. Other lengths available manufactured in beech.
- Lengths of barre can be joined inside the bracket heads to hide the joins and give the impression of a continuous length of barre, for example along the entire length of a studio wall
- Choice of colour: black available as standard, additional colours including grey, white, metallic to order. Chrome plated also available to order.

Under Window Wall-Mounted Brackets

Custom designed brackets to allow wall barres to be fitted across most windows or obstructions. Available to order. Price will depend on actual dimension requirements.

Floor-Mounted Brackets

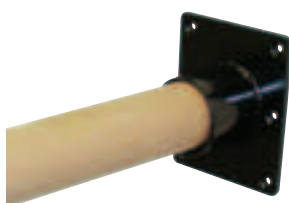

There are many occasions when it is not possible to fix ballet barre brackets onto a wall - perhaps in front of mirrors or where a wall is not suitable to accept fixings. Harlequin's floor-mounted ballet barres are designed to be fitted at the same time as the installation of a Harlequin sprung floor, whereby the vertical leg of the barre support is mounted onto the substrate and the sprung floor built around it. These barres can also be mounted onto an existing floor, providing, of course, that it is not sprung.

Floor-mounted brackets installed on a Harlequin WoodSpring Floor at Colchester Institute.

End Bracket

Bracket specifically for fixing the end of a Harlequin wooden ballet barre to an adjacent wall.

Wall-mounted brackets and end brackets installed at Essex Dance Theatre, Chelmsford.
