

HARLEQUIN'S RANGE OF BALLET BARRES

Whether you choose portable free-standing or permanent wall-mounted ballet barres, you'll realise they are almost a prerequisite for the dancer. Without a comfortable and sturdy barre it is hard to do the essential warm-up and stretching exercises. Both amateurs and professionals can minimise the risk of injury by stretching properly to increase blood-flow to the muscles and improve flexibility whilst achieving an elegant stance.

Single and Double Wall-Mounted Ballet Barres

Harlequin's Wall-Mounted Barres feature various shaped mounting plates to suit the design of your studio. All have strong fixings to the wall: four fixings for the single bracket and six fixings for the double bracket. Brackets are available in various powder-coated coloured finishes.

- Brackets are supplied complete with screws and plugs and can be mounted at any height
- Barres are set at 21cm (8¹/₄") from the wall to the centre of the barre. On the double bracket the two wooden barres are spaced 20cm (8") apart
- Wooden barre is 5cm (2") in diameter and 150cm (60") long. Other lengths available manufactured in beech.
- Lengths of barre can be joined inside the bracket heads to hide the joins and give the impression of a continuous length of barre, for example along the entire length of a studio wall
- Choice of colour: black available as standard, additional colours including grey, white, metallic or other colours to order

Double Wall-Mounted Ballet Barres
