Portable & Permanent Vinyl Floors

HARLEQUIN REVERSIBLE

The working performance surface of a floor is a most important component. Over more than a quarter of a century Harlequin has meticulously developed seven dance floors, four of them compact (i.e. non-cushioned) and the other three having varying qualities of foam backing, both to give slip resistance and point elasticity.

Dance floors are various constructions of vinyl sheet, differing critically from commercial vinyls in that they are formulated to give controlled slip resistance.

The Application Guide for these floors is shown overleaf. The recommendations are indicative only, based on our long experience and dancers' preferences. There are exceptions to almost every recommendation so we strongly advise that you request samples and we invite detailed discussion if you have queries.

This brochure is one of a series of three product groups: vinyl floors; sprung floor systems; accessories. In addition, we have also produced two useful guides: "The Harlequin Guide to Dance Floors" and "Specifying Dance Floors – a Guide for Architects". All are available free of charge.

Fire Rating	DIN 4102-1 class B1

Reversible - Vinyl Floor

HARLEQUIN REVERSIBLE securely established itself years back as the classic double-sided stage floor. It is a calendared vinyl consisting of a complex "sandwich", providing a slip resistant surface on both sides. These special wear-coats are easy to maintain and they are approved by dancers as a loose-lay floor on stage and in the studio.

HARLEQUIN REVERSIBLE is simple to unroll across your stage or dance studio. You just tape the seams and edges - and your floor's ready! When the show's over, quickly roll up your Harlequin and store it or move it to another venue.

HARLEQUIN REVERSIBLE is a different colour on each side, so you can use it either side up. Two floors in one! And because Harlequin Reversible is a full two metres wide, you have fewer joins.

HARLEQUIN REVERSIBLE is ideally laid on any hard smooth surface, such as a wooden stage, and is intended to be loose-laid.
